

Where Precision Meets

ADVANCED TECHNICAL SOLUTIONS & MASTERY

Crafting Industrial Excellence.

Where Precision, Performance,
and Partnership Drive Technical
Success.

Welcome to **ANBI TECHNICAL SERVICE**,
where our workshop expertise and
technical services empower your
operations.

www.anbiseservices.com

MISSION

To provide innovative, reliable, and precise motor winding and electro-mechanical services, engineered solutions, and fully-comprehensive technical support.

VISION

To be the leading global standard-setter in specialized engineering and manufacturing strategy, compliance, and the entire ecosystem of advanced engineering and turnkey solutions.

WE PROVIDE **ENGINEERING SERVICES**

We carry out all types of precision machining works, including the manufacturing of gears, shafts, pulleys, and specialized with required heat treatment. We produce impellers with dynamic balancing based on specified RPM. Our services also include repair and overhaul of gearboxes, vacuum motors, and dewatering pumps.

We specialize in stainless steel and mild steel fabrication, including the fabrication of tanks, silos, structural, ladders, and platforms. Our cutting capabilities cover cast iron, brass, bronze, gun metal, and aluminum.

Core Services and Capabilities

Precision Machining:

Creating precision parts using technologies like CNC turning and milling.

Steel Fabrication:

Designing and fabricating custom steel structures and components.

Repairs and Salvage:

Providing repair services for heavy industrial and construction machines, including machining and salvaging parts.

Specialized Cutting:

Offering advanced cutting services such as waterjet or laser cutting.

Casting Facility

We precision all types of casting in ferrous and non ferrous material in cast iron, brass, bronze, gunmetal and aluminum etc.

Turning Facility

We are having all types of lathes, capable of all kinds of works and boring borings, we are expert in all types of gear manufacturing with required heat treatment. We are also expert in all repairing work of mechanical equipments.

Fabrication Facility

We are providing all types of fabrication work, plate tanks, stair cases, handrails, car shades, cycle racks in SS and MS.

Milling Work

Lathe Work

Mixer Arms

Chrome Plating

Structural Fabrication

ANBI TECHNICAL SERVICE L.L.C.

EXPERTS IN MOTOR WINDING & LATHE MACHINERY

MECHANICAL ENGINEERING SERVICES

We provide high quality machining, fabrication and repair services for a wide range of industrial and commercial applications.

STRUCTURAL FABRICATION

We provide structural fabrication services for industrial and commercial projects with high quality and accuracy.

THREADING

Precision threading services for bolts, shafts, pipes and other components with accuracy.

GEAR BOX REPAIR & MANUFACTURING

Gear box assembling, repairing and maintenance with performance guarantee.

SHAFT REPAIR & MAKING

Shaft repairing, reconditioning and new shaft manufacturing with high precision.

MOTOR COUPLING MAKING

Manufacturing all types of motor couplings – flexible, gear, jaw, grid, and more.

FABRICATION OF FLANGE

Custom flange fabrication as per standard and customer specifications.

THREADING OF SCREW

All types of screw threading services with high precision and surface finish.

TURNING & MACHINING

High precision turning, boring, facing and CNC machining services.

ANBI TECHNICAL SERVICE L.L.C.

EXPERTS IN MOTOR WINDING & LATHE MACHINERY

ELECTRICALS ENGINEERING

SERVICES

We provide reliable and efficient electrical engineering services for motors and industrial equipment with quality workmanship and best performance.

MOTOR REWINDING

Professional motor rewinding services for all types of AC/DC motors with high quality copper wire and insulation for long life and maximum efficiency.

BEARING CHANGING

Expert bearing removal and replacement services to ensure smooth operation, reduce vibration and extend motor life.

MOTOR FABRICATION

Custom motor fabrication services as per requirement including design, assembly and testing for various industrial applications.

MOTOR COVER SLEEVE MAKING

Precision motor cover sleeve manufacturing and machining to protect the motor body and improve durability.

BUSH TO BEARING

Conversion of bush to bearing for smoother performance, less maintenance and increased motor efficiency.

MOTOR COVER MAKING

Manufacturing of motor covers, and shields and fan covers with high precision and quality materials.

MOTOR ASSEMBLY

Complete motor assembly and testing to ensure proper alignment, balance and reliable performance.

TESTING & COMMISSIONING

Motor testing, inspection and commissioning services to ensure safety, quality and optimum performance.

EXPERTS IN MOTOR WINDING & LATHE MACHINERY

MECHANICAL PRODUCTS

COPPER WINDING WIRE & INSULATION

High-grade, coameled copper wire for superior motor rewinds, Includes slot liners, varnishes, and insulating materials for performance.

NEW

BEARINGS & BUSHES

Precision industrial bearings, ball and roller types, and custom-machined brass/bronze bushes for motor and shaft applications.

NEW

WELDING RODS & ELECTRODES

Specialized welding consumables, including stainless steel (S.S.), mild steel, and cast iron rods for fabrication and repair.

NEW

SHAFT & KEYWAY MATERIAL

Raw steel, alloy steel, and stainless steel (t & l) bar stock for custom shaft and key manufacturing. High-tolerance materials.

NEW

FABRICATED COMPONENTS & GENERAL HARDWARE

Custom-fabricated brackets, motor mounts, and a wide range of bolts, nuts, and fasteners used in technical services.

NEW

ELECTRICAL INSULATION MATERIALS & VARNISHES

High-dielectric strength films, tapes, and impregnating varnishes essential for motor rewinding and electrical component protection.

NEW

SEALS, GASKETS & O-RINGS

Essential sealing solutions for motors, pumps, and gearboxes, including oil seals, mechanical seals, and custom-cut gaskets.

NEW

SPECIALIZED LUBRICANTS & COOLANTS

High-performance industrial greases, oils, and cutting fluids designed for extended machinery life, reduced friction, and optimal cutting efficiency.
